WORK EXPERIENCE

ON THE MAP MEDIA

Web Developer / Graphic Designer (July 2011 – Present)

Meeting with clients to determine design/development needs. Creating website prototypes/mockups using Adobe XD and Photoshop. Reviewing prototype with clients for approval and making revisions as needed. Web development using HTML, CSS, JavaScript, jQuery, and PHP. Image retouching and image optimization using Adobe Photoshop and Lightroom. Installation and theme customization for content management systems like WordPress and Squarespace.

ARKE SYSTEMS

Senior Front End Web Developer (January 2017 – January 2018)

Creating web pages or web applications matching business requirements, wireframe interactions, and/or visual designs using HTML5, CSS3, React.js, Bourbon Neat, GIT, KIT language for templating, SCSS, and other web technologies. Building modular UI content that facilitates the creation of component libraries for easy back end integration. Documenting internal web development processes. Image optimization using Adobe Photoshop or Lightroom. Contributing to design and UX discussions to enhance website functionality. Creating website prototypes using Axure or Adobe XD prior to designing and coding.

HOTHOUSE

Web Developer - Contractor (September 2016 – January 2017)

Creating web pages or web applications matching business requirements, wireframe interactions, and/or visual designs using HTML5, CSS3, Angular.js, Bourbon Neat, GIT, Handlebars, SCSS, and other web technologies. Building modular CSS and HTML content that facilitates creation of component libraries and easy back end integration. Customizing WordPress themes. Image optimization using Adobe Photoshop.

PERFICIENT

Senior Front End Web Developer (June 2015 – September 2016)

Creating web pages or web applications matching business requirements, wireframe interactions, and/or visual designs using HTML5, CSS3, jQuery, React.js, Vue.js, JavaScript and other web technologies. Using Bootstrap, GIT, Atom, Assemble, Handlebars, Sass/SCSS, and other tools to aid in the web development process. Image optimization using Adobe Photoshop and Lightroom. Meeting with clients and scrum team to obtain requirements, provide updates and make suggestions for improvement. Creating technical documentation to aid back end developers in implementing front end code. Leading creative review process, tracking changes, and making necessary updates.

FLORIDA SOUTHWESTERN STATE COLLEGE

Webmaster / Project Manager (July 2009 – February 2015)

Developing/maintaining web pages with HTML, CSS, jQuery and PHP based on user requirements. Creating custom graphics used throughout College website using Adobe Photoshop and Illustrator. Optimizing images to minimize page load time. Interviewing stakeholders to determine the best solution to meet their goals. Developing prototypes for new projects using Adobe Fireworks. Integrating web applications with data obtained from Banner ERP system. Creating web forms for use with the Banner Workflow system. Coordinating activities within web services and other areas of IT to ensure projects are completed timely and within scope. Developing the branding for third party web applications. Creating/maintaining technical documentation of web practices and procedures. Creating video clips using Adobe Premiere and After Effects. Maintaining the mobile application. Implementing responsive design throughout the college website.
